EDS = Egyedi keresési élmény

- **Magasabb szintű relevanciába sorolás**
Tárgyszóval való egyezés, aktualitás
- **Részletes metaadatok**
- **Szakkbibliográfiák integrálása**
MathSciNet, CAB Abstracts, FSTA, HeinOnline...
- **Open Source jellegű rendszer**
VuFind, Qulto, Moodle....

What is it?

*A tezauruszokon alapuló
finomított*

RELEVANCIA RANGSOR

a tárgyszavas keresésben

Tematikus keresés dominál

Based on one-week sample of **randomly selected** EDS search queries by market (Sept-2014)

Összefüggések felismerésének hiánya

| TOPICAL QUERY | Subject Indexing in EDS |
|---------------------------|---|
| adhd | Attention-deficit hyperactivity disorder Attention deficit disorder with hyperactivity |
| pheromones | Ectohormones Allelochemicals Semiochemicals Allomones |
| PET scan | Positron Emission Tomography Tomography, Emission-Computed Emission Tomography |
| gambling addiction | Compulsive gambling Pathological Gambling |

User queries and subject indexing not always aligned.

Different vocabularies often use different terminology for the same concept.
