To Whom It May Concern:

ProQuest LLC, (ProQuest), a part of Cambridge Information Group, is committed to providing global access to one of the largest online content repositories in the world. Throughout ProQuest's evolution we've established our position as the leading provider of microform and electronic information to school, academic, public, and government libraries around the world. Since 1938, we've worked closely with the worldwide publishing community to preserve and provide access to information. Our many long-term, trusted partnerships with publishers have made ProQuest the information company of choice for over 9,000 publishers.

ProQuest aggregates source material from third-party publishers and creates associated abstracts, indexes, transcripts and other proprietary elements for such material to make up our products and services. The databases we provide are derivative works as defined under the Copyright Act of 1976, Title 17 U.S.C. and are subject to separate copyright protection. ProQuest is the sole holder of the copyright in the ProQuest-created products and services as a collective or derivative.

With respect to third-party databases, ProQuest distributes and hosts certain third-party databases and in some cases provides the associated full-text articles, transcripts and other value added elements to compliment the offering through ProQuest's own proprietary online search engines. Additionally, ProQuest is the proprietary owner of the on-line platforms that form a substantial part of the **ProQuest**®, **Alexander Street**™, **RefWorks**®, and its other on-line information and research services.

As a result, ProQuest is the sole provider for the following unique database collection:

*The Visual History Archive offers multiple pathways to learn from the eyewitnesses of history across time, locations, cultures and sociopolitical circumstances. The streaming archive is digitized, fully searchable, and cross-referenced to ProQuest content owned by the institution. Students, professors, researchers, and others can retrieve whole testimonies and segments within testimonies, with searching to the minute based manual transcription, 65,000 keyword index terms, 1.9 million names, and 719,000 images.*
