## Research

Woodland Dynamics Relocation on Pleistocene Netherlands (200 BC–AD

**Authors:** Bert Groenewoudt

## Abstract

In this paper we investigate the potential of the interaction between settlement dynamics and landscape composition and structure. The results show that (Pleistocene sandy soils of the Netherlands) can be traced by a careful examination of pollen production, provided such remains are not subjected to meticulous dating, preferably using a useful source of information when

# Common Questions

- The cost of publishing?
  - GBP 300 per journal article
  - Approx. GBP 3,250 for a standard book (200 pages)
- Who makes decisions?
  - The Publishing Committee, based on recommendations from the editorial boards
- Which subject areas do you cover?
  - All the areas where there's a demand for reasonably priced OA publishing
  - An Editorial Board for the subject area is also needed
- What dissemination channels do you use?
  - OAPEN for online books
  - Amazon (INT) & Bokinfo (SWE) for Print-on-Demand books
  - Subject area databases & Search Engine Optimisation for journals (takes time to fulfil criteria)
- Approved by the Norwegian Register for Scientific Publishers (Level 1) & The Danish Bibliometric Indicator
- What organisations are you members of?
  - OASPA, pDOAJ, Ubiquity Partner Network, CrossRef & COPE (the last two via Ubiquity Press)
